

**Reference for Arif Shivji, CA MBA CFA**

**Role: Contract CFO**

Our company hired Arif Shivji for our public junior oil & gas company in the summer of 2009. Over five weeks, he worked over 240 hours to file our public reporting for the 2008 fiscal year-end, Q1 2009 and & Q2 2009. I wish all to know that Arif has done an impossible job within an unreasonable deadline and accomplished the incredible. At the time, Wedge was in a difficult situation, being unable to access back-up documentation for the period and working under regulatory restrictions with a very short mandatory filing deadline.

Arif had to recreate accounting records from the start of the 2008 fiscal year without the benefit of many of the back-up documents which were inaccessible, such as accounts payable listings and historical general ledger. He backed all of his journal entries with a historical record and gave us a closing we can rely on for future financials.

I give the highest recommendation for Arif Shivji as a contract CFO, especially involving the following tasks:

- Oil & Gas accounting, including joint venture reconciliation
- Corporate tax (T2s, flow-through expense renouncement, GST)
- Financial statements and MD&A preparation

Arif's exceptional level of commitment ensured that the public reporting was completed on a timely basis and provided adequate documentation for our records (memos & worksheets for calculations). In addition, he even accepted flexible payment terms at our request.

Arif has enabled us to go forward with confidence for the next quarters. We appreciate his hard work and would be available to answer any questions related to this project.

Sincerely,

Robin Dow
